

## Sign Up for Eduuni-ID

You are required to sign up your **work email address** to use the Eduuni services. Eduuni-ID is created when you sign up and confirm your own work email address. The work email address is your identity in Eduuni.

For signing in you can use your own existing credentials. The sign in method that you choose will be attached to the Eduuni-ID. For example you can sign in with the Google account and still appear as the representative of your organisation by your work email address in Eduuni services. Trusted sign in methods are:

- Organisation's own credentials, if your organisation is member of [Haka-](#), [Virtu](#) or [eduGAIN-](#) identity federations or your organisation uses Microsoft Office 365 (Azure AD) services.
- ORCID, B2ACCESS, MPASS or ELIXIR AAI – credentials.
- Facebook, Google, LinkedIn, Microsoft or Twitter – credentials.

Eduuni-ID is valid for one year at the time and the work email address has to be signed up again after that.

If you can't find your home organisation from the list, you can use the Facebook, Google, LinkedIn, Microsoft, Twitter, Yahoo! or Office 365 accounts to sign in. The sign in method will be saved to the browser's cookie.
